CO-OPERATIVE CREAMERY IS PROPOSED FOR BULKLEYITES

Farmers of the Valley Will Meet in Telkwa to Consider Advisability of Establishing this Important Industry as a Means of Effecting a Reduction in Transportation

The farmers of the Bulkley valley are now on the right track to make success for themselves and to do a great deal of good for the district in which they live. The Bulkley Valley Agricultural Association and Farmers' Institute have called a meeting for Wednesday afternoon, March 3, at 2.30 p.m., and the chief business will be a discussion of the advisability of establishing a co-operative creamery in the Bulkley valley.

The valley farmers have been going into stock-raising on a somewhat extensive scale for several years and their herds are increasing rapidly. The supply of milk and butter is much greater than the demand for local consumption, or the distances to transport it are so great that in small quantities the transportation charges eat up all the proceeds. As individuals there is small opportunity to derive full returns from their dairy cows. By co-operation they will have a permanent market for all their milk, and butter will be made in such quantities that it can be

placed on the market at a price that will compete with imported butter and at the same time make a profit for the farmers, both from their milk and from their investment in the creamery.

The establishment of a creamery in the Bulkley valley is a step in the right direction, and every farmer should make it a point, not only to attend the meeting, but to take part in the discussion and to use his utmost efforts to get the industry under way. After that they should all devote their attention to milk production and thus make it a success. Once the creamery business is established more will follow and the farmers of the northern interior will rapidly come to the front and win a reputation for dairy produce.

After the general meeting in Svenson's hall in the afternoon, a farmers' dance will be held in the evening in the Telkwa hotel, at Aldermere and to this all are invited to be present. The ladies will serve refreshments.

The Government Standard Method

BY TOM AND JERRY

"Hello, Jerry, come in. You haven't been around for a week. I thought they had pinched you for being inquisitive about government business."

"Oh, Tom, quit your kiddin'. You know they wouldn't pinch me although they are making an awful holler and some times get to the very brink of trouble themselves. Very undignified, don't you know."

"But say, Tom, what's all that road machinery lying around the country unprotected—such as graders, rollers, etc?"

"That's a foolish question for you to ask Jerry. Who ever heard of road machines being on the voter's list."

"That's just about it Tom. I heard some of the boys discussing roads and the government's method of building them. They didn't like to see expensive machines lying out in the weather and never put into use. Neither did they like the idea of an expensive road superintendent on a yearly salary with a stable full of high priced horses eating their heads off, and used only for hauling their own feed, taking out pleasure parties and to loan to

party friends. The government owns enough horses to keep the road machinery going all summer and to get some real road work done, but as the boys understand it, to use horses and machinery would get the work done too fast too good and not enough men to keep the voter's list solid would be required. Then there would be fewer picks and shovels required and the patronage lovers would howl.

"Good roads are one of the greatest assets a country could have. The roads we find are a liability—not because money has not been spent on them, but because the work has been badly done, due to the lack of ability of the heads from the minister down the line, and it will never be any better as long as the chief object is to secure votes."

Redistribution Report

The redistribution commission report was brought down in the Legislature on Tuesday. It recommends that there be five new seats. Prince Rupert is to have a city member; Omineca is to be a new constituency running from Kitselas to this end of Fraser Lake; Portland Canal and the Nass are to added to Atlin; Vancouver is to get a new member and Greater Vancouver is to get two new seats. The government has not yet taken action.

BRITISH AEROPLANE RAIDS DUSSELDORF

London, Feb. 11—The Daily Telegraph reports from Rotterdam that a successful air raid by the British was made over Dusseldorf. Fearing such a raid the Germans recently built a secret storehouse some distance from the arsenal into which the war material and explosives were removed. The raiders discovered this store and dropped bombs on and set fire to it.

TO HOLD PUBLIC MEETING IN OLD TOWN SATURDAY

Prominent Liberal Speakers Will Turn Searchlight on Provincial Legislation and Mal-Administration of McBride-Bowser Government.

A public meeting will be held in the Assembly Hall, Hazelton, to-morrow (Saturday) afternoon, at three o'clock. The meeting is under the auspices of the Liberal association in the old town and such well known speakers as T. D. Pattullo, A. M. Manson, Fred Stork and H. F. McRae will address the meeting.

Intense and general dissatisfaction is being expressed with regard to the present plutocratic government, whose virtues are being lauded by a subsidized press to your detriment, and if you think you are entitled to see the other side of the picture—a peep behind the scenes—it will be well worth your while to be at the Assembly Hall, Hazelton, on Saturday afternoon at three.

GERMANY OFFERS PEACE TO FRANCE

Asks Tremendous Concessions Though Greatly Modifies Terms After Battle of the Marne

Paris, Feb. 10—Government states that before the battle of the Marne, Germany offered peace, demanding Madagascar, Morocco, two French towns and an indemnity. After the battle Germany offered to give up Alsace and Lorraine, except Strassburg, in exchange for a small zone on the north coast, France to acknowledge annexation of Belgium by Germany. This situation forced the resignation of the French minister of war, who favored the peace terms.

Thieves Were Busy

A couple of weeks ago thieves broke into the cabins at the Surprise mine on Glen mountain and cleaned them out. Only the stoves were left. They got away with an outfit sufficient for some sixteen men.

COSTLY COMMEMORATION OF KAISER WILHELM'S BIRTHDAY

Twenty Thousand Germans Are Sacrificed on the Altar of Prussian Militarism and Futile Adoration of Mad Emperor in France and Belgium—Allies Lost Few

Paris, Feb. 10—An eye witness with the French army says:—"The last period of ten days has been one of comparative calm. Actions in which but small forces were engaged developed upon limited fronts and had no effect upon general operations. In the fighting on the German emperor's birthday, the French found a number of bodies which indicates of generally admitted proportion of four wounded to one killed, and warrants the conclusion that the German losses during the three days were 20,000."

To the above statement the London Chronicle adds:—"It is well to repeat this figure, which is disputed by the German general staff, but which is correct." Tribute is paid to the heroism of native troops, who held their conquered positions and inflicted severe punishment upon the Germans. Two defeats of Germans between LaBasse and Arras are reported, more than 200 dead being found after the fighting. It is believed that the Germans lost in killed and wounded at least three companies, while French

losses were extremely light—only seven killed and six wounded.

The Germans began action with an intense artillery fire. They hurled hand grenades at a point of first line of trenches causing serious damage to Allies' line. In this assault the Germans also lost heavily, estimated at 4000 killed and wounded. Allies' losses numbered 100 killed and wounded.

Daring aerial expeditions over the enemy's lines during night as well as in day are noted.

An audacious attack on Ostend occurred in which three German officers were killed.

During the afternoon of Monday, Feb. 8, we blew up in front of Fay, south-east of Peronne, a mine gallery in which the enemy's soldiers were at work.

Seizes American Steamer

Falmouth, Feb. 9—The American steamer, Wilhelmina, which has a cargo of food supplies for Germany, arrived here this afternoon. The captain of the Wilhelmina said he came to Falmouth of his own free will and had no prize crew aboard the boat.

ALLIES BAYONETS PROVE EFFECTIVE

Repulsed Vigorous Attack by Germans After Occupying Excavations Made at Laboisselle

Paris, Feb. 11—Official—During the night of the 9th and 10th we blew up Laboisselle with three series of mines and we succeeded in occupying the excavations thus made notwithstanding the counter attack which we repulsed with the bayonet. In Argonne there has been artillery fire and throwing of bombs on all sides, particularly in the region of Bolante and Bagatelle. It is reported that the Germans have delivered a very violent, but fruitless attack on the fortifications of Marie Thereso. In Lorraine, at LaLisiere, east of the Forest of Parroy and to the north of that forest, our advance posts have repulsed an attack of the enemy. In Vosges, at LaFontainelle, an attack by the enemy has been checked.

To Get a New Trial

It has been announced that a new trial has been granted John May, the Indian convicted of the murder of Bert Taylor. It is expected that he will be tried in Prince Rupert at the spring assizes.

ELECTION IN APRIL McBRIDE TO QUIT

Bowser to Lead Conservative Party to the Polls in April—Latest Dope From Victoria

It is now reported in Victoria that there are confidential rumors of a provincial election this coming April. Premier McBride is supposed to resign in favor of Dominion Trust Bowser. The premier is to run in New Westminster for the Dominion House and J. D. Taylor, the present member is to go to the senate.

Children's Services

A week from next Sunday, Feb. 21, a children's service will be held in the Presbyterian church. Rev. D. R. McLean will give a special talk to children and they will furnish special music. All the hymns will be the same as used in the Sunday school. This service should be of greatest interest to everyone. It is proposed to hold a similar service once a month in future.

Paris, Feb. 11—Semi-official—In the region of Cagny, one of our aviators has destroyed a signal balloon. A German aeroplane was brought down near Verdun and pilot Lieut. Von Hidelen was made a prisoner.

FRIDAY, FEBRUARY 12, 1915

THE restoration of silver to its rightful place as a circulating medium is more than likely to take place as a result of the European war. At the present time paper securities are paying the expense of the war, but the day will soon come when a metallic basis of settlement will be demanded and then, from present indications, silver will come into its own again, for the limitations of gold are known and now almost universally admitted. More money the world must have, and there is not enough gold in circulation, or available to supply the demand; and, the situation is so serious that, according to reports in circulation, Great Britain, France, Belgium Russia and Japan have agreed to a proposition made by Secretary Bryan to standardize silver at a ratio of 20 to 1, which would give silver an intrinsic value of virtually \$1 an ounce. We believe that this is no idle dream, and that before the close of another year silver will have a market, as well as an intrinsic value, of 75c or \$1 an ounce, and that this value will be maintained by law. Should the re-monetization of silver be restored the benefits to this western country would be almost immeasurable. We hope that the day is not far distant when the white metal will be rehabilitated, and we believe that it is not very far off.

SIR George Foster delivered a very eloquent and acceptable oration on the war before the Canadian Club, Montreal. Even his announcement that the government was going to ask for a further appropriation of a hundred million dollars for war purposes was lustily cheered. He asserted that for hundreds of years Britain had fought

only for peace, that is, for the defence of her empire and of weaker nations. He showed beyond controversy that in this case she had done her utmost to preserve peace. She was now fighting for her honor and her pledged word; she was fighting also for self-protection, as, France, once crushed, and France's colonies absorbed, Germany would have every advantage in attacking Britain's dependencies and England herself. He had not much to say this time about "splendid isolation." On the contrary, every Serbian, Russian, Belgian and Frenchman in battle was as surely fighting for Canadian liberty as were the British. Germany is our mortal enemy, but our only one. This is surely a far more wholesome state of things than splendid isolation. It is Germany that is now in that predicament, and we see how it looks. Defiance is unamiable, and is indeed well adapted, if not directly intended, to produce the response of hate. —Montreal Witness.

SERBIA needs aid as much as Belgium. There is a starving population there that, comparatively speaking, no one is caring for. Serbia was attacked just as Belgium was. She defended herself successfully because she had the Austrians, not the Germans, to fight, but her triumph has left her land a complete desolation and her population starving. We may say that we are not so much interested in the Serbians as in the Belgians. They are comparatively a turbulent, semi-civilized people, whose king came to the throne by assassination, and who have been much at war with their neighbors since the benumbing rule of the Turk was, a short generation ago, withdrawn. What then? How do we know what they would have been had they not been oppressed for long ages by voluptuous pashas? Any way what does that matter? The claim of their need remains the same. They are a nation that is in a position to be entirely remade, and any brotherly kindness they may receive from the western world will be of the greatest possible service in determining what the future nation will be. —Montreal Witness.

TAKING time by the forelock the Liberals of the interior have begun organizing for the next election, be it this spring or a year from this spring. On Wednesday night the first meeting was held in Smithers when delegates were present from Prince Rupert and nearly every point along the line of the G. T. P. as far as Fraser Lake. The first meeting made considerable progress and on Thursday morning and afternoon

the delegates continued their work and completed the organization. Fuller particulars will be given next week. The Liberals are not alone in this organization, but Conservatives and Independents are also joining hands to help the work along. Conditions in this district warrant the action being taken and the people are now alive to the unparalleled negligence and unfitness of the present administrators. It is time the Victoria legislature was composed of an entirely different stamp of men, and there is every reason to believe that the first opportunity the voters get they will elect a more dependable and a more substantial lot of representatives to the legislature.

Reduced Postal Rate

The post office department at Ottawa announces that all correspondence from Canada to the soldiers at the front will be only two cents in future instead of the former rate of five cents, as is the regular rate on correspondence to the continent.

Agricultural War Book

The Herald has received a copy of the Agricultural War Book which has been issued by the department of agriculture at Ottawa. This book is a presentation of facts and suggestions bearing on the present and probable future supply of agricultural products as influenced by the war. From time to time the Herald, in its agricultural columns, will quote from this book.

Items of Interest to the Ranchers

Manure and Potash

Since trade with Germany has been cut off considerable interest has been taken by the department of agriculture in the subject of fertilizers. Potash is one of the most important fertilizers. A recent bulletin says:— "The sources of potash available to our farmers and which, if recognized and used, will render us largely independent of the German salts. First we have the farm manures. These are not usually thought of as a source of potash, much to our national loss. We are safe in saying that

thousands of tons of potash from this source are annually wasted in Canada. With certain minor exceptions, as in the wool of sheep and the milk of dairy cows practically all the potash in the feeds and fodders consumed by our farm stock is excreted by the kidneys. More than 90 per cent of the potash excreted by the animal is to be found in the urine, and this, in addition to the fact that one half or more of the total nitrogen excreted is also present in the liquid excreta. It thus comes about that weight for weight, urine has a greater man-

urial value than the solid excrement, and this not only by its larger percentages of potash and nitrogen, but because these constituents are in a soluble condition and practically at once available for the nutrition of crops.

Next week wood ashes as a fertilizer will be discussed.

Weed Seeds in Feeding Stuffs

Bran, shorts and chop feeds are some times contaminated by ground screenings which are mixed with them in some of the flour mills. Of 396 samples collected throughout Canada in 1913 by the Inland Revenue Department, 140 contained an average of 57 noxious weed seeds per pound, and only 144 of the samples were entirely free from vital

Nyal's Family Remedies

Victor Victrolas

From \$20 Up

A Large Assortment of Records

NEW HAZELTON HAZELTON

weed seeds. One sample of chopped feed contained 1,104 noxious weed seeds per pound. Bulletin No. 254 of the Inland Revenue Department gives the names and addresses of the manufacturers and the quality of the mill feeds.

Helping the Settlers

In West-Australia the Agricultural Bank has rendered valuable service. Up to the present over \$12,000,000 has been distributed to assist settlers to purchase implements, plants, stock and fertilizers, and to enable them to carry on improvements generally on their holdings. Interest is paid on the money advanced, and when the loans are repaid they are made available for others.

Disease and Failure

Possibly more failures in the poultry business are due to disease than to any other cause. The great cause of disease is neglect in keeping houses, coops, and yards clean. In the winter if houses are not cleaned regularly and well, the birds, especially if closely housed, are very likely to contract a serious disease that may be contagious and spread throughout the whole flock. The same may be said of the summer houses and coops and also poultry runs. All buildings should be kept clean at all times. White-wash in the summer. Use lots of coal oil and crude carbolic acid on roosts, nests, ect. to destroy lice. Dig the runs every summer, lime them well and sow a crop of wheat or rye for green food in the fall and to help purify the ground.

Dealing with dairy cows the department of agriculture at Ottawa urges that farmers endeavor to extend the milking periods of their cows. Some are allowed to dry after about seven months milking and usually this happens in the fall when feed is scarce and during the winter they are fed and are producing nothing.

A cow may start off with 1,200 pounds of milk the first month and not produce as much for the season as the cow which gives only 800 pounds the first month and milks several months longer. It's a test for the whole season which determines the best cow. Keeping track of the weight by each cow is simplified by using the forms supplied free by the government. Write the dairy commissioner, Ottawa, for samples of the record forms for three days per month, and those for daily weights. It will be still better to take samples as well so as to learn by the test how much fat each cow gives.

High-class, pure bred sires are destined to be in greater demand than ever before. There is a gradual awakening to the real value of a prepotent herd header.

If you are a bit short of fodder make it up by the use of the curry comb and brush. Seems queer doesn't it? And yet the better physical condition of the stock makes them assimilate the feed better and so less is required. Think of this, try it and you will see that it is so.

You won't need to have a moratorium fort to slink behind

Are you keeping pace with the demands of modern progressiveness in its application to business and to business principles? Are you conducting your business in conformity with the dignity that is so essential to success; are you living up to the dignity of your calling? Is your character reflected in all the dealing you have with your customers? If the latter be so, it would be next to impossible for you to place the value to your institution in dollars and cents of having these facts known to those with whom you have, or hope to have, business dealings of all kinds.

This is where GOOD PRINTING comes in

The quality of his printing readily attests to the character of the man, and also establishes his commercial standing. Your business sagacity and the quality of the goods you sell—your very right to appeal for public support—are reflected in your printed matter. Time was when business men were satisfied to do their correspondence on a

piece of brown wrapping paper, and break forth in a tirade of abuse because the government demanded that it be enclosed in an envelope. And they got away with it then. But imagine the reception you would get were you to apply for a line of credit from your supply house in a letter written on such paper.

Drop in and see our samples of Better Printing or write for our book of Letterhead Suggestions

LYNCH BROS., New Hazelton
General Merchants

F. W. Renworth, Prince Rupert, was in town this week on business.

Jim Bates left Tuesday to act as watchman on the Sealey gulch bridge.

Al Harris left Thursday morning on a business trip to Vancouver for a couple of weeks.

Louis Knaus arrived in town the past week after spending a few months in the south. He will remain here until mining is resumed in the spring.

It is rumored that the benedicts and bachelors will play at hockey next Tuesday night. It should be a good game to watch and no doubt a big crowd will be present.

One of the railway men using a speeder met with a nasty accident last week when he had the four fingers on his left hand taken off. His wounds were dressed at the hospital.

Communion service was held

in the Presbyterian church last Sunday evening. The attendance was one of the largest for many months. Mr. Renworth, Prince Rupert, rendered a flute solo, accompanied by Mrs. D. R. McLean.

LIBERALS ARE NOW ORGANIZED

Well Attended Meeting Last Monday Night—F. C. McKinnon the New President

It was evident from the attendance at the organization of the Liberal Association that the spirit of Liberalism and of independence is rapidly gaining in this community. It was the largest meeting the local Liberals have ever held and this is only the start.

W. J. MacKenzie retired from the presidency and F. C. McKinnon was unanimously elected to that office. L. B. Warner was re-elected secretary-treasurer. A strong executive was elected and after the Smithers convention a second meeting will be held.

LIBERALS HAVE AN ORGANIZATION

Got Together in Smithers and Have Started a Campaign—Three Speakers from Rupert

About forty delegates, representing the Liberals and that portion of the population which seeks a just administration of the affairs of the province, met at Smithers on Wednesday night and started the organization of a Liberal Association. The work was completed on Thursday and an active campaign is now under way.

On Thursday night a public meeting was held in Smithers at which a great crowd was present and unusual enthusiasm was displayed.

From Prince Rupert Messrs. A. M. Manson, Fred Storke and H. F. McRae were present. New Hazelton was represented by F. C. McKinnon, W. J. MacKenzie, Rev. D. R. McLean and H. A. Harris; Hazelton by S. J. Martin and Kispiox by Hugh Taylor. Representatives were also present from practically every point east of here.

AN ELEVATOR MAP

Valuable Publication for Farmers and Stock Men Can Be Had Free

A recent edition of an elevator map just issued from the department of the interior shows some very interesting information with respect to the storage and transportation facilities for the handling of the annual grain production of the three western provinces. The map shows the elevator capacity at each station on the different lines of railways, and, in order to simplify the location of the various places, each railway system has been shown in a separate colour. In addition to complete information regarding elevators, the publication includes

CANADIAN PACIFIC RAILWAY

BRITISH COLUMBIA COAST STEAMSHIP SERVICE

G.T.P. RAILWAY—Westbound train leaves New Hazelton at 10.55 a. m., Sundays and Thursdays, connecting with the above steamers for the south. Eastbound train leaves New Hazelton at 5.55 p. m., Wednesdays and Saturdays, for Edmonton, Winnipeg, etc., connecting with trains for St. Paul, Chicago, etc.

For TORONTO, MONTREAL, BUFFALO, etc., use the Grand Trunk Railway System—The Double Track Route. For full information regarding the above services, through tickets, reservations, etc., apply to Local Agent, or to ALBERT DAVIDSON, General Agent, Prince Rupert, B.C. Agent for all Atlantic Steamship Lines.

valuable railway information with respect to lines in operation, under construction and located.

Copies of the publication may be obtained free of charge upon application to F. C. C. Lynch, Supt. of railway lands branch, Dept. of the Interior, Ottawa.

Small Boys Hockey Game

Last Saturday afternoon one of the best hockey games of the season, from the spectator's point of view, was pulled off on the local rink when the juveniles of the old town met the juveniles of New Hazelton. The little fellows, and some of them were not as big as their sticks, showed a lot of knowledge of the game. They had a good deal of combination and there is undoubtedly material in the rising generation for first-class hockey players. The New Hazelton boys won by a score of 6 to 4. The return game will be played in the old town this afternoon. After the last game the boys were given a feed in the Northern Hotel.

Smithers Beat Old Town

At last the Smithers hockey boys have got down to their winning gait, but it was too late to be effective. On Wednesday the divisional boys administered the first defeat of the season to the old town by a score of 6 to 4. Smithers had the best of the game at all stages and the real strength of Irwin, Prince Rupert who has played defence for the old town was demonstrated. He was not brought up from the coast Wednesday and Smithers played all around the old town guards. It was a good game to watch and the Smithers people were well pleased.

Helping to Advertise Us

F. H. Dobbin, who spent two months last summer in charge of the Omineca Herald, recently addressed a large meeting of young men in Peterborough, Ont., taking as his subject Prince Rupert and the territory along the G. T. P. to New Hazelton. Mr. Dobbin has also written several articles for newspapers and magazines which were decidedly favorable to this district.

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY
Deputy Minister of the Interior.
